

QUIRKWIRECO.

High Temperature Wire & Cable

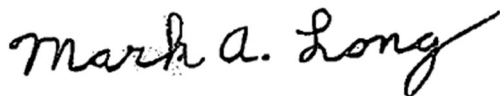

Quirk Wire Co. routinely communicates with its raw material suppliers to ensure conformity with the Restriction of Hazardous Substances Directive 2011/65/EU (RoHS2) and as amended by the Restriction of Hazardous Substances Directive 2015/863/EU (RoHS3). The directive was adopted by the member states of the European Union to restrict the use of certain hazardous substances in electrical and electronic equipment in order to prevent the risks to human health and the environment.

The RoHS Directive list the following ten substances as restricted: lead, cadmium, polybrominated biphenyls (PBB) and polybrominated diphenyl ethers (PBDE), bis(2-ethylhexyl) phthalate (DEHP), butyl benzyl phthalate (BBP), dibutyl phthalate (DBP) and diisobutyl phthalate (DIBP).

Quirk Wire Co. is committed to complying with the RoHS Directive and confirms none of the above substances are found in any of the raw materials used in the manufacture of our high temperature wire and cable products.

The Directive on Waste Electrical and Electronic Equipment (WEEE) is not applicable to the components manufactured by Quirk Wire Co.

If you have further questions or concerns that need to be addressed, please do not hesitate to contact us.
